

## HF 200

SPECIFICATIONS	HF200
Frequency Range	5KHz-20KHz
Power Rating (system watts)	200w
Average sound pressure level at 1 metre for 1 watt input	103dB
Input impedance	8 ohms
Overall width	4 1/2" 114.3cm
Overall height	4 1/2" 114.3cm
Overall depth	3 1/4" 78cm
Total weight	6lbs 2.7kg
Distortion	3% THD @110dB S.P.L./ 1 metre 6% THD @ 25w R.M.S. sine
Polar Response	@ -6dB 5KHz 90°H x 65°V 10KHz 90°H x 36°V 15KHz 28°H x 24°V

These units must be used with a crossover to protect the drivers from low frequencies i.e. HPX4. When Fane horns are used with Electronic Organs or Synthesizers it should be noted that the special distribution of power differs from normal programme material by having high frequency content.
